The 1,933 seat concert hall is designed as an adaptable venue, able to serve many types of events. 821 orchestra level seats (including pit area) and 1112 seats in the Grand Tier (or balcony level) of the theater, with separate lighting controls and access points, allow the hall to accommodate audiences of various sizes in comfort.

An adjustable music shell may be deployed to enhance the acoustical presence of an orchestra, chorus, soloist, or chamber ensemble. For theatrical, dance, and other large-scale productions, the shell vanishes, opening up a large stage with ample wing space and a computer-controlled fly system.

The concert hall comes equipped with state of the art lighting and sound systems, a large orchestra pit, and the ability to vary the acoustical character of the room for the needs of a given production.
